

INSTALLATION INSTRUCTIONS

Model IN-4 Indicator Panel

The Model IN-4 Indicator Panel is to be used with the Pump Plus HO Battery Charger. This indicator has a Green Led to show the batteries are fully charged and the charger is not charging and Red Led to show the charger is charging.

To Mount the IN-4:

1. Remove the two screws installed on the indicator. These are for factory assembly purposes only.
2. Locate a suitable spot on the vehicle and mark the desired location.
3. Drill out the three holes. Use a 1" hole saw for the wires and a 5/32" diameter drill for the two screw holes. See diagram below for hole dimensions.
4. Mount indicator to the vehicle with the two # 6-32 screws provided.
5. Connect the wiring as shown in wiring diagram for the Pump Plus HO charger.
